FOREWORD

Rwanda Education Board is honored to avail the Entrepreneurship Syllabus for Teacher Training Colleges (TTCs). This document serves as official guide to teaching and learning of Entrepreneurship in TTCs. The document ensures consistency and coherence in the delivery of quality education in TTCs, pre-primary and primary education.

The Rwandan education philosophy is to ensure that young people at every level of education achieve their full potential in terms of relevant knowledge, skills and appropriate attitudes that prepare them to be well integrated in society and exploit employment opportunities. The rationale of the changes is to ensure that TTC leavers are qualified for job opportunities and further studies in in different programs under colleges of education for career advancement.

The ambition to develop a knowledge-based society and the growth of regional and global competition in the labour market has necessitated the shift to a competence-based curriculum in TTCs. The TTC curriculum was revised to align it to competence-based curriculum with basic education to prepare teachers who are competent and confident to implement CBC in pre-primary and primary education.

I wish to sincerely express my appreciation to the people who contributed towards the development of this syllabus, particularly, Consultants, REB staff, UR-CE Lecturers, TTC Tutors, Teachers from general education and experts from local and international organizations for their technical support. A word of gratitude goes to head teachers and TTCs principals who availed their staff for various revision activities.

Special appreciation goes to the development partners such as UNICEF, USAID/ Chemonics International-Soma Umenye project, Save the Children and Right to Play for their financial support and other education partners who supported the activity.

I take this opportunity to call upon all education stakeholders to bring in their contribution for successful implementation of this syllabus.

Dr. NDAYAMBAJE Irenée

Director General, REB.

iii

ACKNOWLEDGEMENT

I wish to sincerely express my special appreciation to the people who played a major role in development of Entrepreneurship syllabus. It would not have been successful without the support from different education stakeholders. My thanks first go to the leadership of UR-CE who started the review of the TTC curriculum in 2015.

I wish also to thank Rwanda Education Board (REB) leadership who initiated and supervised the curriculum review process. I wish to extend my appreciation to Consultants; staff from REB, MINEDUC, National Itorero Commission, Lecturers from UR-CE, TTC principals, TTC Directors of Studies, tutors, teachers from basic Education and whose efforts during the revision process was much valuable.

Special thanks go to UNICEF who funded the development, designing finalization and printing of this syllabus.

I owe gratitude to different education partners more especially USAID-Soma Umenye, Save the Children, Right To Play, Help a Child, Aegis Trust, Humanity and Inclusion, Flemish Association for Development Cooperation and Technical Assistance (VVOB), Voluntary Service Overseas (VSO), Teach Rwanda and IEE for their technical support

Ms. Joan Murungi,

Head of Curriculum, Teaching and Learning Resources Department / REB

GENERAL INTRODUCTION

1.1 RWANDA EDUCATION SECTOR OBJECTIVES

The education sector objectives are the reference point for the inclusion of education issues into other Rwandan policy documents. These objectives are aligned with those recommended in the Eastern African Curriculum Framework proposals. The Government of Rwanda through law number 36/2018 of 29th June, 2018 determining the organization of education revised the objectives of the sector. They are to:

- 1. Provide Rwandans with adequate skills at all levels of general, professional as well as technical and vocational education;
- 2. Offer quality courses and education at all levels;
- 3. Promote science, technology and research in order to equip many Rwandans with capacity to speed up national development;
- 4. Promote the culture of peace, tolerance, justice, respect for human rights, solidarity, democracy and that of avoiding any form of discrimination or favouritism;
- 5. Provide each Rwandan with an integrated education based on ethical values, science and social welfare and directed towards building a nation to ensure its sustainable development
- 6. Instill into Rwandans the love of a job well done, the value of hard work, punctuality and promotion of competence
- 7. Train the Rwandan to have freedom of thought, be innovative, have abilities to acquire and be analytical towards other people's opinions and to communicate his or her own ideas, to be patriotic and encourage him or her to be updated on the situation prevailing elsewhere;
- 8. Eliminate all grounds and obstacles that hinder the development of girls and women education as well as of any other groups that need special attention.

These objectives and associated strategies are the backbone for developments in education including the curriculum and assessment policy and the curriculum framework.

1.2 LEVEL COMPETENCES OF PRIMARY TEACHER EDUCATION IN THE REPUBLIC OF RWANDA

As stated earlier, Primary Teacher Education is under the responsibility of Rwanda Education Board. The following are the competences of Teacher Education. By the time a student teacher is exiting the college after three years he or she should:

- Be a qualified teacher who can compete not only locally but regionally and internationally;
- Have professional ethics and develop an inquiring mind for innovative education;
- Be prepared adequately for efficiency in education, administration, management, evaluation and measurement;
- Be competent, reliable, honest and responsible.
- Be equipped with potentials that enable him/her to explore the learners abilities and interests
- Be able to develop the child's ability in critical thinking, free expression and ideas.

1.3 BACKGROUND TO CURRICULUM REVIEW

The Entrepreneurship syllabus is prepared for TTC student-teachers of all options. The motive of reviewing the syllabus is to ensure that the syllabus is responsive to the needs of the student-teachers and to shift from objective and knowledge-based learning to competence-based learning. Another reason is to align the TTC curriculum to the CBC in general education. Emphasis in the review was put more on skills and competences as well as the coherence within the existing content by drawing on the previous syllabus and benchmarking with syllabi elsewhere with best practices.

The Entrepreneurship syllabus guides the interaction between the tutor and student-teachers in the learning processes and highlights the competences a student teacher should acquire during and at the end of each unit of learning. Student- teachers will have the opportunity to apply Entrepreneurial competences in different contexts and see its importance in daily life. Tutors help the student- teachers appreciate the relevance and benefits for studying Entrepreneurship from pre-primary to tertiary levels.

The learning of student teachers is influenced by many factors such as curriculum relevancy, necessary and sufficient pedagogical approach by tutors, assessment strategies and sufficient instructional materials. With review of the Entrepreneurship syllabus, these factors have been aligned with the competence-based curriculum for general education. This will lead to having qualified and competent teachers who are ready to implement the competence based curriculum for pre-primary and primary education. This implies equipping student teachers with relevant knowledge and understanding, skills, attitude and values necessary to make them competitive on local, regional and global labour market. This syllabus will allow future teachers to contribute to the development of equity and quality education at preprimary levels and then it will enable student teachers to go for further studies.

1.4 RATIONALE OF TEACHING AND LEARNING ENTREPRENEURSHIP

Entrepreneurship stimulates people to build successful lives and contribute to the development of their society by creating and managing income generating projects adapted to local realities. It prepares young people for the uncertainties and complexities of the real business world where business opportunities exist. In entrepreneurship education, there is a key to drive to ensure that Rwandans actively create employment opportunities rather than having a mindset of relying on others. It will also help them to qualify for further studies in higher education in different programs under colleges of education for education career advancement.

1.4.1 ENTREPRENEURSHIP AND SOCIETY

Entrepreneurship education is a vital part of the process to build a prosperous society, a driving force behind employment, economic growth and competitiveness. Business representatives can support entrepreneurial teaching and learning in many ways: as experts, supporters and as mentors. A successful entrepreneur is an asset to the society. He or she can contribute to the wellbeing of the society in several ways, such as provision of goods and services, creating new markets, new technologies, new institutional forms, new jobs and net increases in productivity that improves the living conditions of people.

With entrepreneurship education, Rwanda will transform from a subsistence agricultural economy into a knowledge-based society, with a vibrant class of entrepreneurs. This new TTC Entrepreneurship syllabus therefore is intended to address gaps in the previous one which lacked adequate and appropriate knowledge, skills, attitude and values.

1.4.2 ENTREPRENEURSHIP AND STUDENT TEACHERS

The subject is meant to change the attitudes of learners by encouraging them to focus more on self-employment and self-reliance. It is also to raise awareness amongst young people and the broader community for promotion of the potential youth entrepreneurs. The attitude of young people is also a driver of their productivity. Many Rwandan youths lack a culture of entrepreneurship while some youth perceive certain types of jobs as jobs for second zone citizens. This further translates into a negative attitude towards learning skills related to those perceived as blue-collar jobs.

Entrepreneurship education will help to ensure that the key transferable soft skills that employers need are being provided to all secondary graduates, including academic skills, communication and team-work skills. Entrepreneurship education will also help to reduce skills gaps and shortages, improving productivity and business performance, increasing opportunities to boost the skills and productivity of the workforce sector on equal opportunities and relevant employment trainings among learners

Using this syllabus, students will have, progressively more challenging educational activities, experiences that will enable them to develop the insight needed to discover and create entrepreneurial opportunities, and the expertise to successfully start and manage their own businesses to take advantage of these opportunities. Therefore, entrepreneurship education helps learners to apply business knowledge, skills and attitudes to solve environmental, economic and social problems in their everyday lives.

1.5 PROFESSIONAL STANDARDS AND COMPETENCES

1.5.1 COMPETENCES

Competence is defined as the ability to perform a particular task successfully, resulting from having gained an appropriate combination of knowledge, skills, attitudes and values. The present syllabus gives the opportunity to student teachers to develop different broad Entrepreneurship competences as well as the generic competences.

Broad subject competences are broken into key unit competences for the year. These competences for the year decode into key unit competences which are finally split out into learning objectives (knowledge, skills, attitudes and values) in each learning unit. Taking into account the rationale behind the overall TTC curriculum review as well as the parameters and constraints of the local context, student-teachers will be equipped with professional standards and generic competences.

For student teachers, professional standards are acquired through generic competences and professional practices that are emphasized and reflected in the learning process. The Entrepreneurship tutors will ensure that student -teachers are exposed to tasks that help them acquire these competences.

1.5.2 TEACHING PROFESSIONAL STANDARDS

These refer to the characteristics that all teachers globally should have. All teachers in Rwanda should have at least the characteristics listed below:

• The teacher has knowledge of CBC and how to implement it

The teacher has understanding of CBC and how it works. He/she has knowledge of basic and generic competences and is able to integrate the cross-cutting issues within and across subject area.

• The teacher as an educator

The professional teacher enhances and stimulates cognitive, social-emotional, physical and moral development of the children. She or he therefore has a thorough understanding of the child's background, interests, motivations and problems and can adjust his/her actions and the learning environment to the different needs of the student teachers. A competent educator is a role model, showing desired behavior and values. S/he guides and coaches his/her student teachers to become social, self-confident, independent, responsible, open-minded and innovative people and act like a role model. In order to be educator, the student teacher must be supported in developing cooperation, inter personal and lifelong learning skills.

• The teacher as entrepreneurship subject expert

The professional entrepreneurship teacher/tutor stimulates the student teacher's critical thinking, problem solving and creativity. Entrepreneurship is best learnt when active and experiential learning strategies are used. Such strategies promote meaningful learning because they enable the learners to retain knowledge for longer periods and to apply their knowledge and skills to real-life issues and situations. Some of the teaching and learning strategies that are suitable in an entrepreneurship course are the use of skills lab pedagogy, case studies and simulations, teamwork, brainstorming, mind mapping, portfolios, seminar presentations and real-world applications. By ensuring that student teachers engage in experiential learning and real-world applications, tutors can help them acquire the practical, current business knowledge and skills to foster enterprising attitudes in their lives.

The teacher as Entrepreneurship expert knows and uses appropriate methods/techniques to assess learners and give constructive feedback to the whole class. The teacher as an Entrepreneurship expert should be able to facilitate learners to apply Entrepreneurship competences and use other subject's content as resources to deal with real life situations and realize that entrepreneurship is not a mere school subject but a reality that profoundly affects their lives and that of their future students.

• The teacher as a communicator

The professional tutor displays a good example in his/her way of expressing him/herself, stimulates and enhances positive and clear communication between him/her and the learners, between learners themselves, school community and the wider society. A good communicator is open-minded and respects diversity within and around the school. This requires learners to effectively communicate in official languages.

• The teacher as a guide and an organizer

The professional tutor facilitates the holistic development of all student teachers, taking into account the differences between them. S/he ensures that the learning environment (class, playground, etc.) is well maintained and conducive for children's learning outcomes. This requires a student teacher to be equipped with management skills.

• The teacher as an innovator, researcher and reflective practitioner

The professional teacher looks at ways to improve his/her teaching, and the wellbeing and results of his/her student teachers. S/he is a reflective practitioner and knows how to perform small-scale reflective action.

The acquisition of such skills will require student- teacher to update knowledge and skills with minimum external support and to cope with evolution of knowledge advances for personal fulfillment in areas that need improvement and development, thus becoming lifelong learners.

1.5.3 BROAD ENTREPRENEURSHIP COMPETENCES

The overall goal of entrepreneurship education is to give student teachers the attitudes, knowledge, skills and values to act in an entrepreneurial way. In entrepreneurship, a TTC student teacher upon completion of TTC, should be able to:

- Develop and implement a business plan for a viable business opportunity.
- Use the available resources properly and responsibly to implement business opportunities.
- Keep accounting records for her/his business properly.
- Analyze the impact of business activities on the environment.
- Exercise ethical behavior in business

1.5.4 ENTREPRENEURSHIP AND DEVELOPING COMPETENCES

The national policy documents based on national aspirations identify some "basic competencies" alongside the "generic competencies" that will develop higher order thinking skills and help student teachers learn subject content and promote application of acquired knowledge and skills. The basic competencies alongside the generic competencies are stated in such way that will develop higher order thinking skills and which will help subject learning and application of what has been learnt in real life situation.

Through learning sessions such as skills lab, group work discussions, presentations, debates, research work, field visits, role plays and business simulation games, learners develop abilities and skills that are transferable to new situations such as critical thinking, research and problem solving, creativity and communication.

With the above learning activities, student teachers will not only develop competencies but also values such as appreciating diversity,

determination, involvement, tolerance, responsibility, respect, loyalty, patience, dignity and the like.

2. PEDAGOGICAL APPROACH

The change to a competence-based curriculum is about transforming learning, ensuring that learning is deep, enjoyable and habit-forming.

2.1 ROLE OF THE STUDENT TEACHER

In the competence-based syllabus, the student teacher is the principal actor of his/her education. He/she is not an empty bottle to fill. Taking into account the initial capacities and abilities of the student teacher, the syllabus suggests under each unit, some activities of the student teacher and they all reflect active participation in the learning process.

The teaching and learning processes will be tailored towards creating a student teacher friendly environment basing on the capabilities, needs, experience and interests.

The following are some of the roles or the expectations from the student teachers:

- Student teachers construct the knowledge either individually or in groups in an active way. From the learning theory, they move in their understanding. Therefore, the opportunities should be given to student teachers to manipulate.
- Student teachers work on one competence at a time to form concrete units with specific learning objectives (knowledge, skills and attitude).

- Student teachers will be encouraged to do research and present their findings through group work activities.
- Student teachers are cooperative: they work in heterogeneous groups to increase tolerance and understanding.
- Student teachers are responsible for their own participation and ensure the effectiveness of their work.

2.2 ROLE OF THE TUTOR

In the competence-based syllabus, the tutor is a facilitator, organizer, advisor, and conflict solver.

The specific duties of the tutor in a competence-based approach are the following, Tutor is:

- A facilitator: his/her role is to provide opportunities for student teachers to meet problems that interest and challenge them and that, with appropriate effort, they can solve. This requires an elaborated preparation to plan the activities, the place they will be carried, the required assistance;
- An organizer: his/her role is to organize the student- teachers in the classroom or outside and engage them through participatory and interactive methods through the learning processes as individuals, in pairs or in groups. To ensure that the learning is personalized, active and participative, co-operative the teacher/tutor must identify the needs of the student teachers, the nature of the learning to be done, and the means to shape learning experiences accordingly;
- An advisor: he/she provides counseling and guidance for student-teachers in need. He/she comforts and encourages student teachers by valuing their contributions in the class activities;
- A conflict-solver: most of the activities are performed in groups. The members of a group may have problems such as attribution of tasks; they should find useful and constructive the intervention of the teacher as a unifying element.

Asked for help only when the whole group agrees to ask a question

Ethical and preaches by examples by being impartial, by being a role-model, by caring for individual needs, especially for slow student teachers and those with physical impairments, through a special assistance, by providing remedial activities or reinforcement activities. One should notice that this list is not exhaustive.

2.3 SPECIAL NEEDS AND INCLUSIVE EDUCATION APPROACH IN ENTREPRENEURSHIP

All Rwandans have the right to access education regardless of their different needs. The underpinnings of this provision would naturally hold that all citizens benefit from the same menu of educational programs. The possibility of this assumption is the focus of special needs education. The critical issue is that we have student teachers who are totally different in their ways of living and learning as opposed to the majority. The difference can either be emotional, physical, sensory and intellectual learning challenges.

These student teachers equally have the right to benefit from the free and compulsory basic education in the nearby ordinary/mainstream

colleges. Detailed guidance for each category of student teachers with special education needs is provided for in the guidance for teachers. The Entrepreneurship tutor is advised to work closely with the tutor of special need education to provide appropriate support to any identified student -teacher's needs.

2.4 SKILLS LAB PEDAGOGY

Entrepreneurship is a practical subject. Students must have time to practice. Student teachers should engage in business clubs to guarantee practice of entrepreneurship. It is called "Skills Laboratory" or "Skills Lab" for abbreviation because students research, experiment, and practice their entrepreneurial skills during this time. No special facilities or equipment is required for Skills Lab. In order for student teachers to learn entrepreneurship program focused on developing transferable 21st century skills, the pedagogical structure of skills lab is provided in the learning activities.

Skills lab is a when student teachers are required to complete learning activities working in small groups. The skills labs are easy method to change teacher's pedagogy from theory-based to competency-based instruction. Skills lab ensures teachers are accountable to completing all the learning activities and projects as outlined in the syllabus.

The basic characteristics of Skills Lab are:

- Students work in small groups (manageable teams)
- Assessment takes place through portfolio activities
- Students talk more than teachers (10% teacher talk time and the rest is for the students)
- Students receive constructive feedback on their work (Teacher gives quality feedback on student presentations).
- Skills lab consists of three components: build, practice and present.
- Link to student business club as a platform for practicing real life activities through making of products.

Skills lab is the time when lesson combines the competencies acquired during the unit and previous units to make learning more practical. Thus, at the end of every unit, this syllabus provides /suggest skills lab pedagogy lesson to ensure practical application of the competencies acquired.

3. ASSESSMENT APPROACH

Assessment is the process of evaluating the teaching and learning processes through collecting and interpreting evidence of individual student teacher's progress in learning and to make a judgment about a student teacher's achievements measured against defined standards. Assessment is an integral part of the teaching learning process. In the new competence-based curriculum assessment must also be competence-based; whereby a student teacher is given a complex situation related to his/her everyday life and asked to try to overcome the situation by applying what he/she learned.

3.1 TYPES OF ASSESSMENTS

The assessment should reflect the three domains of learning, namely cognitive, social affective and psychomotor:

- Knowledge and understanding: Does the student- teacher demonstrate an understanding of the Entrepreneurship concept? Has the student- teacher mastered the Entrepreneurship concepts? Indicators: correctness of answers, coherence of ideas, logical reasoning, uses correctly entrepreneurship concepts, etc.
- **Practical skills:** How does the student -teacher performs on aptitude and practical tests? Indicators: accuracy, using appropriate methods, quality product, speed and efficiency, and coherence.
- Attitude and values: How does the student-teacher respond to a task or a situation? What is the student-teacher's behavior? How the student-teacher persists on solving a given problem?

3.1.1 FORMATIVE ASSESSMENT

Formative assessment helps to check the efficiency of the process of learning. It is done within the teaching/learning process. Continuous assessment involves formal and informal methods used by colleges to check whether learning is taking place. When a tutor is planning his/her lesson, he/she should establish criteria for performance and behavior changes at the beginning of a lesson. Then, at the end of every unit, the tutor should ensure that all the student teachers have mastered the stated key unit competences basing on the criteria stated, before going to the next unit. The tutor will assess how well each student teacher masters both the subject and the generic competences described in the syllabus as well as the professional practices. From this, the tutor will gain a picture of the all-round progress of the student teacher. The tutor will use one or a combination of the following techniques: observation, pen and paper, and oral questioning.

3.1.2 SUMMATIVE ASSESSMENT:

When assessment is used to record a judgment of a competence or performance of the student teacher, it serves a summative purpose. Summative assessment gives a picture of a student teacher's competence or progress at any specific moment. The main purpose of summative assessment is to evaluate whether competences have been achieved and to use the results for ranking or grading of student teachers, for deciding on progression, for selection into the next level of education and for certification. This assessment should have an integrative aspect whereby a student must be able to show mastery of all competences. It can be internal College based assessment or external assessment in the form of national examinations. College summative assessment average scores for each subject will be weighted and included in the final national examinations grade. The national examinations will be done at the end of year 3 for certificate award. College based assessment average grade will contribute a certain percentage to be determined by the institution in charge of national examination.

Particularly, in teacher training colleges the summative assessment will have two parts:

- National examinations: Subject content will be examined at the end of three years in Teacher Training College. This assessment will cover 70% of the overall assessment.
- **Professional practice:** Although entrepreneurship subject is not taught at primary level, professional practice as a mandatory for a pre service teacher and another is another type of assessment, which contributes 30% to the overall assessment. The student teacher is assessed gradually from year I to year III and records are kept until the completion of the college. The student teacher professional marks will be added to the marks obtained from national examinations to form the overall assessment results.

Aspect of professional practice assessed from year I to Year III include:

- Observation
- Microteaching
- Teaching practice on demonstration schools
- Final lesson (conducted by the team of internal and external examiners)
- School attachment and reflective practices (internship

For the student teacher to be awarded the certificate of successful completion of TTC, the overall results should obligatorily contain at least 21% of the professional practice assessment results which is equivalent to 70% of professional practice.

3.2 RECORD KEEPING

This is gathering facts and evidence from assessment instruments and using them to judge the student - teacher's performance by assigning an indicator against the set criteria or standard. Whatever assessment procedures used generate data in the form of scores which will be carefully recorded and stored in a portfolio. The latter is used in deciding remedial actions, alternative instructional strategy and as well as feedback to the student teacher. The records also are important to parents to check the learning progress and to advise accordingly. Finally, the records are very essential to the final assessment of professional practice of the student teacher at the end of the college.

This portfolio is a folder (or binder or even a digital collection) containing the student teacher's work as well as the student teacher's evaluation of the strengths and weaknesses of the work. Portfolios reflect not only work produced (such as papers and assignments), but also it is a record of the activities undertaken over time as part of student learning. Besides, it will serve as a verification tool for each student teacher that he/she attended the whole learning before he/she undergoes the summative assessment for the subject.

3.3 ITEM WRITING IN SUMMATIVE ASSESSMENT

Before developing a question paper, a plan or specification of what is to be tested or examined must be elaborated to show the units or topics to be tested on, the number of questions in each level of revised Bloom's taxonomy and the marks allocation for each question. In a competence-based curriculum, questions from higher levels of Bloom's taxonomy should be given more weight than those from knowledge and comprehension level.

Before developing a question paper, the item writer must ensure that the test or examination questions are tailored towards competence based assessment by doing the following:

- Identify topic areas to be tested on from the subject syllabus.
- Outline subject-matter content to be considered as the basis for the test.
- Identify learning outcomes to be measured by the test.
- Prepare a table of specifications.
- Ensure that the verbs used in the formulation of questions do not require memorization or recall answers only but also testing broad, subject and generic competences as stated in the syllabus.

4. RESOURCES

4.1 MATERIALS NEEDED FOR IMPLEMENTATION

The materials that the tutors will need to aid the learning process include but are not limited to the following:

- Materials to encourage group work activities and presentations: Computers (Desktops and laptops) and projectors; Manila papers and markers, textbooks and handouts
- Materials for enhancing research skills: Textbooks and internet (the list of the textbooks to consult is given in the reference at the end of the syllabus and those books can be found in printed or digital copies).
- Reference books like textbooks, learners' and teachers' guides, entrepreneurship journals, magazines.
- Case study materials and scenarios.
- Computer and Internet connection.
- Projectors.
- Audio visual study and video materials.
- Entrepreneurship incubation facilities.
- Successful business resourceful people.
- Business simulations.
- Individual and group business projects.
- Data analysis software such as Microsoft Excel.
- Business incubators.
- Accounting software such as QuickBook, Sage, Pastel, Tally, Peachtree etc.
- Raspberry pi software.

4.2 HUMAN RESOURCE

The effective implementation of this curriculum needs a joint collaboration of educators at all levels. Given the material requirements, tutors are expected to accomplish their noble role as stated above. The staff in charge of education at District and sector level should ensure overall support to TTCs for a successful implementation. On the other hand, TTC principles and TTC deputy principals are required to

make a close follow-up and assess the teaching and learning of this subject due to their profiles in the schools. These combined efforts will ensure bright future careers and lives for student teachers as well as the contemporary development of the country.

In a special way, the tutor of Entrepreneurship at TTC level should have a firm understanding of entrepreneurship concepts and pedagogical content of teaching Entrepreneurship. He/she should be qualified in Entrepreneurship and have a firm ethical conduct. The tutor should possess the qualities of a good facilitator, organizer, problem solver, listener and adviser. He/she is required to have basic skills and competence of guidance and counseling because students may come to him or her for advice.

A competent TTC tutor of entrepreneurship must have at least the following minimum qualifications: a Bachelor's degree in education with entrepreneurship, business studies, business administration, economics, management, finance.

Skills required for the Tutor of entrepreneurship

- The tutor of Entrepreneurship should have the following skills, values and qualities:
- Engage student teachers in variety of learning activities
- Use multiple teaching and assessment methods
- Adjust instruction to the level of the student teachers
- Have creativity and innovation the teaching and learning process
- Be a good communicator and organizer
- Be a guide/ facilitator and a counselor
- Manifest passion and impartial love for children in the teaching and learning process
- Make useful link of Entrepreneurship with other Subjects and real life situations
- Have a good master of the Entrepreneurship Content as well as pedagogical content of teaching Entrepreneurship

14

• Have good classroom management skills

The table below shows an overview of number of topic areas, sub-topic areas and units for TTC per year

	Year 1	Year 2	Year 3
Topic Areas	5	5	5
Sub-Topic Areas	5	8	5
Units	8	9	6

5. SYLLABUS UNITS DEVELOPMENT

5.1. ENTREPRENEURSHIP SYLLABUS UNITS FOR YEAR ONE

- 5.1.1. Key competencies at the end of Year One
- Exhibit desirable qualities of an entrepreneur
- Make rational career choices and related decisions
- Set achievable entrepreneurial goals
- Justify the need for standards and its role in business
- Conduct market research for business startup and growth
- Analyze the factors that lead to business growth and development
- Classify different forms of businesses
- Design business organization structure

5.1.2. Entrepreneurship units for year one

Subject: Entrepreneurship Y		Year: 1		Options : SME; SSE; LE; ECLPE
Topic Area: Entrepreneurship Cultu	ıre	Sub Topic: Entre	preneurship as a career	·
Unit 1: Initiation to entrepreneursh	ip			No. of periods: 8
Key Unit competence: To be able to	exhibit desirable qualities	s of an entrepreneu	ır	•
Learning objectives				
Knowledge and understanding	Skills	Attitudes and values	Content	Teaching / Learning Activities
Explain the meaning of entrepreneurship, an entrepreneur, Intrapreneur and manager	Identify people in the community with entrepreneurial qualities	Demonstrate desirable qualities of an entrepreneur	Meaning of: – Entrepreneurship – An entrepreneur	Reflecting to the understanding of entrepreneurship in O'level, student- teachers brainstorm the meaning of entrepreneurship, entrepreneur,
Define the qualities of an entrepreneur	Describe how	Appreciate	 Intrepreneur Manager Qualities of an 	intrapreneur, manager and identify the desirable qualities of an entrepreneur
Explain the stages of Entrepreneurship process	creativity and innovation helps to sustain different activities	innovative business projects in their community	entrepreneur – Risk taking – Persistence – Self-confidence	In their learning teams, student teachers discuss the stages of entrepreneurship process.
Explain the different types of entrepreneurs	Discover community problems and come	Judge	 Self-confidence Hardworking Etc. 	Class field visit to the nearby trading center to identify types of entrepreneurs in their community Skills Lab : Student teachers in their
Distinguish between creativity, innovation and invention	up with innovative projects to solve them			learning groups identify possible business ideas and the resources available in the community.

Discuss the meaning of entrepreneurship in relation to creativity and innovation	creatively and innovatively challenges facing their community	 Discovery Concept development Resourcing Actualization Harvesting Types of entrepreneurs Innovative Imitative Drone Fabian Etc. Types, benefits and challenges of Creativity 	Use the community map information like resources available, challenges, missing needs in relation to skills and passion; discuss possible business ideas that can be implemented to solve the problems observed in the community. Groups present their findings
		 Innovation and invention 	

Assessment criteria: Can explain desirable qualities of an entrepreneur and classify types of entrepreneurs

Link to other subjects: Social studies, Science and Elementary Technology

Resources: Internet: Reference books: newspapers: Mark Amon Mugaru, Edward Erasmus Kayanja (2017), Ordinary Level Entrepreneurship. Kigali, Rwanda: MASTEP General Suppliers Ltd

Subject: Entrepreneurship			l Year 3	Option: SME; SSE; LE; ECLPE
Topic Area: Business growth and sust Unit 2: Environmental impact assessn	-	1 0	siness in socio-economic developm ronment	ent and No. of periods: 8
Key Unit competence: To be able to pr	repare EIA report as a to	ool for preventing ne	gative effect of business activities or	the Environment
Learni Knowledge and understanding	ng objectives Skills	Attitudes and values	Content	Learning Activities
Explain the concept of environment. Describe effect of business activities on the natural environment. Explain the preventive measures to reduce negative effects of business activities on the natural environment Explain the meaning of Environmental Impact Assessment Report Describe the steps of preparing EIA Report Explain the importance of EIA report	Analyze impact of business activities on the natural environment Apply preventive measures to conserve the environment Analyze steps of preparing EIA Report Design an EIA report for their business projects	Solve environmental problems caused by business activities Develop culture and advocate for environmental conservation in their communities.	Definition of environment Effect of business activities on the environment Positive - Employment - Proper disposal of waste - Payment of taxes - Preserving culture - Easy access to social survives - Etc Negative - Displacement of people - Pollution - Soil degradation - Deforestation - Diseases - Etc.	In relation to O'level entrepreneurship student teachers brain storm the meaning of environment Student teachers analyze the provided sample of EIA report of any business, identify positive and negative effect of that business to the natural environment and come up with preventive measures.

Preventive measures	Student teachers
– Reforestation	prepare a simple EIA report for any business
- Sensitization and education	of their choice to the
– Recycling	authorities e.g. REMA.
– Use of appropriate technology	Skills Lab:
- Soil conservation	Student teachers in
– Etc	their groups.
EIA report	Assess all their busines
Meaning of EIA report	activities against the EIA criteria to find
	out the exact impact
Steps of preparing a EIA report	they will have on the
– Project screening	environment, Prepare EIA report for their
– Scoping	business activities
- Assessment of the project	and present it to the college and the local
– Impact management	authorities.
– Report development	
– Public participation	
– Review	
– Decision	
– Monitoring	
Importance of EIA report	
- Avoid costs and delays in implementation of projects	

 Enhance responsibility of relevant parties Provide beneficial information in decision making Etc
--

Assessment criteria: Can prepare Environmental Impact Assessment (EIA) report

Subject: Entrepreneurship			Year: 3	Option: SME; SSE; LE; ECLPE
Topic Area: Employment rea				
Unit 5: Team leadership				No. of periods: 6
Key Unit competence: To be	able to demonstrate a good	l leadership strategy	for leading teams in the bu	isiness.
	Learning objectives		Content	Learning Activities
Knowledge and under- standing	Skills	Attitudes and values	-	
Explain the meaning of leadership Describe the qualities of a good leader. Describe various leadership styles. Explain the meaning of team building	Choose leadership styles to use in their businesses and community Apply strategies of managing their teams in business work. Explain team building steps/techniques.	Recognize the application of leadership style depending on situations in their businesses and community Embrace the importance of team building and team work in managing their businesses	Meaning of leadershipQualities of a leader– Intelligent– Honesty– Disciplined– Exemplary– Inspiring– Flexible– Etc.Leadership styles– Autocratic– Democratic– Laissez faire etc.	Student teachers discuss the meaning of "Leadership" and a "Leader"Student teacher's role play a scenario demonstrating differen leadership styles practiced in their community.Then they discuss scenarios under which specific leadership styles can be used when leading a team.

		0, 1, , , 1
Discuss strategies of managing	Team building	Student teachers
a team.	Meaning	give testimony about their leaders in the
	Characteristics of a good team	community to enable
	– Common goal	them come up with
Explain the importance of teams in business.	– Cooperative	leadership styles
teams in business.	– Division of labor	and qualities of a
	– Team leader	good leader during a
	– Hardworking	discussion.
	- Etc	Student teachers
	Step for building productive	discuss the meaning
	and effective teams	of "team" and give
	– Establish leadership	qualities of a good
	<u>^</u>	team.
	- Establish relationship with each of your employees	Student teachers work
	– Build relationship between	in their different groups
	your employees	to solve a challenge that
	– Foster teamwork	requires them to work as a team, teams should
	- Set ground rules for the team	compete against each
	- Etc	other to determine the
		winner.
	Strategies for	
	managing a team	They reflect after the game to learn how
	– Encourage participation	various teams used
	– Model respect	strategies to win.
	– Treat members fairly	
	– Use positive feedback	
	– Etc.	

	 Why teams are useful in business Eases work Achieving set goals Easy management of workers Team work spirit Commitment at work Quick business growth Etc 	Skills Lab: Student teachers carry out a leadership style personality test for every member; analyze the strength and weaknesses of every personality. Identify matches of people who should work together more effectively. effectively and present to the whole class			
Assessment criteria: Can motivate and lead team members to complete class group task successfully Link to other subjects: Social studies, Foundations of education
