FOREWORD

Rwanda Education Board is honored to avail Social studies Syllabus for Teacher Training Colleges (TTCs). This document serves as official guide to teaching and learning of Social studies in TTCs.

The Rwandan education philosophy is to ensure that young people at every level of education achieve their full potential in terms of relevant knowledge, skills and appropriate attitudes that prepare them to be well integrated in society and exploit employment opportunities.

The ambition to develop a knowledge-based society and the growth of regional and global competition in the labour market, has necessitated the shift from knowledge to competence based curriculum in TTCs. The TTC curriculum was revised to align it to the Competence-Based Curriculum for basic education to prepare teachers who are competent and confident to implement CBC in pre-primary and primary education. The rationale for the changes in the curriculum is to ensure that TTC leavers are qualified for job opportunities and further studies in Higher Education in different programs under education career advancement.

I wish to sincerely express my appreciation to the people who contributed towards the development of this syllabus, particularly, Consultants, REB staff, UR-CE Lecturers, TTC Tutors, Teachers from general education and experts from Local and international Organizations for their technical support. A word of gratitude goes to the Head Teachers and TTCs principals who availed their staff for various revision activities.

Special appreciation goes to the Development Partners such as UNICEF, IEE, USAID/Soma Umenye, Save the Children and Right To Play for their financial support.

I take this opportunity to call upon all educational stakeholders to bring in their contribution for successful implementation of this Syllabus.

Dr. NDAYAMBAJE Irénée
Director General, REB.

ACKNOWLEDGEMENT

I wish to sincerely express my special appreciation to the people who played a major role in development of Social Studies syllabus. It would not have been successful without the support from different education stakeholders. My thanks first go to the leadership of UR-CE who started the review of the TTC curriculum in 2015.

I wish also to thank Rwanda Education Board (REB) leadership who took over and supervised the curriculum review process. I wish to extend my appreciation to Consultants, REB staff, Lecturers from UR-CE, TTC Principals, TTC Directors of Studies, Deputy Principals, Tutors and Teachers from secondary general Education whose efforts during the revision process were much valuable.

Special thanks go to UNICEF who funded the development, designing finalization and printing of this syllabus.

I owe gratitude to different education partners more especially USAID-Soma Umenye, Save the Children, Right To Play, Help a Child, Aegis Trust, Humanity and Inclusion, Flemish Association for Development Cooperation and Technical Assistance (VVOB), Voluntary Service Overseas (VSO), Teach Rwanda and IEE for their technical support

Joan Murungi,
Head of Curriculum, Teaching and Learning Resources Department (CTLRD)

1. GENERAL INTRODUCTION

1.1. Rwanda education sector objectives

The Education Sector objectives are the reference point for the inclusion of education issues into other Rwandan policy documents. These objectives are aligned with those recommended in the Eastern African Curriculum Framework proposals. The Government of Rwanda through law number 36/2018 of 29th June, 2018 determining the organization of education revised the objectives of the sector. They are to:

1. Provide Rwandans with adequate skills at all levels of general, professional as well as technical and vocational education;
2. Offer quality courses and education at all levels;
3. Promote science, technology and research in order to equip many Rwandans with capacity to speed up national development;
4. Promote the culture of peace, tolerance, justice, respect for human rights, solidarity, democracy and that of avoiding any form of discrimination or favoritism;
5. Provide each Rwandan with an integrated education based on ethical values, science and social welfare and directed towards building a nation to ensure its sustainable development
6. Instill into Rwandans the love of a job well done, the value of hard work, punctuality and promotion of competence
7. Train the Rwandan to have freedom of thought, be innovative, have abilities to acquire and be analytical towards other people's opinions and to communicate his or her own ideas, to be patriotic and encourage him or her to be updated on the situation prevailing elsewhere;
8. Eliminate all grounds and obstacles that hinder the development of girls and women education as well as of any other groups that need special attention.

These objectives and associated strategies are the backbone for developments in education including the curriculum and assessment policy and the curriculum framework.

1.2. Level of Competences of Primary Teacher Education in the Republic of Rwanda

As stated earlier, Primary Teacher Education is under the responsibility of Rwanda Education Board. The following are the competences of Teacher Education. By the time a student teacher is exiting the college after three years he or she should:

- Be a qualified teacher who can compete not only locally but regionally and internationally;
- Have professional ethics and develop an inquiring mind for innovative education;
- Be prepared adequately for efficiency in education, administration, management, evaluation and measurement;
- Be competent, reliable, honest and responsible.
- Be equipped with potentials that enable him/her to explore the learners' abilities and interests
- Be able to develop the child's ability in critical thinking, free expression and ideas

1.3. Background to Curriculum Review

The Social Studies syllabus is developed for TTC student-teachers in the option of Early childhood and Lower Primary Education.

The motive of reviewing the syllabus was to ensure that the syllabus is responsive to the needs of the student-teacher and to shift from objective and knowledge-based learning to competence-based learning. Another reason was to align the TTC curriculum to the CBC in general education. Emphasis in the review was put more on skills and competences as well as the coherence within the existing content by drawing on the previous syllabus and benchmarking with syllabi elsewhere with best practices.

The Social Studies syllabus guides the interaction between the tutor and student -teachers in the learning processes and highlights the competences a student teacher should acquire during and at the end of each unit of learning. Student- teachers will have the opportunity to apply Social Studies in different contexts, and see its importance in daily life. Tutors should help the student- teachers appreciate the relevance and benefits for studying Social Studies.

The learning of the student teacher is influenced by many factors such as curriculum relevance, necessary and sufficient pedagogical approach by tutors, assessment strategies and sufficient instructional materials. With review of the Social studies syllabus, these factors have been aligned with the competence-based curriculum for general education. This will lead to having qualified and competent teachers who are ready to implement the competence based curriculum for pre and primary education. This implies equipping student teachers with relevant knowledge, skills, attitude and values necessary to make them competitive on local, regional and global job market. This

revised syllabus will allow future teachers to contribute to the development of equity and quality education at pre/primary levels and then it will enable student teachers to go for further studies.

1.4. Rationale of Teaching and Learning Social studies

Social studies subject deals with human beings, the world they live in, their behavior, growth and development, organization, relationships and resources. It is a vital subject for student-teachers in Rwanda which provides them with the basic knowledge, skills, values and attitudes for their profession, continue for further studies, make informed decisions and positively participate in society.

Social studies is also designed to increase various skills and abilities such as critical and analytical examination of the causes and effects of economic, geographical and historical phenomena both locally and globally. It has the ability to challenge student-teachers in various current political, socio economic and geographical issues to which they propose solutions as active members of the society. For example, they understand how different societies are structured, managed and governed, thus appreciate their place in the world by developing universal understanding of their environment and the interrelationship which exists between the natural and human habitats. Hence, it prepares them to be productive and successful citizens.

1.4.1. Social studies and Society

Social studies is a key to the Rwandan education ambition of developing a knowledge-based and technology-led economy since it provides to student teachers all required knowledge and skills to be used in different learning areas. Therefore, it is important subject as it supports other subjects. This TTC Social studies syllabus is intended to address gaps in the current syllabus which lacks of adequate and appropriate knowledge, skills, attitude and values.

1.4.2. Social Studies and Student Teachers

Student -teachers need enough basic competences to be effective members of Rwandan society including the ability to equip student teachers with knowledge, skills and attitudes necessary to enable them to succeed in an era of rapid technological growth and socio-economic development. Mastery of basic social studies ideas makes student teachers being confident in problem solving. It enables the student teachers to be systematic, creative and self-confident in using Social Studies language and techniques to reason; think critically; develop imagination, initiative and flexibility of mind.

As new technologies have had a dramatic impact on all aspects of life, wherever possible student- teachers should gain experience of a range of ICT equipment and applications.

1.5. Professional Standards and competences

1.5.1 Competences

Competence is defined as the ability to perform a particular task successfully, resulting from having gained an appropriate combination of knowledge, skills, attitudes and values. The present syllabus gives the student teachers opportunity to develop different basic competences as well as the generic competences.

Broad subject competences are highlighted and broken into key competences for each year, these are further broken into key unit competences which are finally split into learning objectives

(knowledge, skills, attitudes and values) in every learning unit.

Taking into account the rationale behind the overall TTC curriculum review as well as the parameters and constraints of the local context, student- teachers will be equipped with professional standards and generic competences.

For student teachers, professional standards are acquired through generic competences and professional practices that are emphasized and reflected in the learning process. The tutors will ensure that student -teachers are exposed to tasks that help them acquire these competences.

1.5.2. Teaching Professional Standards

These refer to the characteristics that all teachers globally should have. All teachers in Rwanda should have the six characteristics listed below:

- **The teacher has knowledge of CBC and how to implement it.**

The teacher has understanding of CBC and how it works. He/she has knowledge of basic and generic competences and is able to integrate the cross cutting issues within and across the subject area.

- **The teacher has knowledge of CBC and how to implement it.**

The teacher has understanding of CBC and how it works. He/she has knowledge of basic and generic competences and is able to integrate the cross cutting issues within and across subject area.

- **The teacher as an educator**

The professional teacher enhances and stimulates cognitive, social-emotional, physical and moral development of the children. S/he therefore has a thorough understanding of the child's background, interests, motivations and problems and can adjust his/her actions and the learning environment to the different needs of the students. A competent educator is a role model, showing desired behaviour and values. S/he guides and coaches the students to become social, self-confident, independent, responsible, open-minded and innovative people. In order to be an educator, the student teacher should *be supported to develop* cooperation, inter personal and lifelong learning skills.

- **The teacher as subject expert**

The professional teacher stimulates the student's critical thinking, problem solving and creativity. S/he uses teaching/learning methods and techniques that are appropriate to preprimary and primary education; S/he applies relevant content, plans lessons, integrating play-based strategies in teaching and learning. The teacher in preprimary and primary education has a thorough Social Studies knowledge that enables him/her to develop teaching/learning materials and in lesson planning so as to effectively deliver the lesson and connect with daily life activities in preprimary and primary education using the language of instruction correctly. The teacher as a subject-expert in upper primary education stimulates English in the teaching/learning process by considering the transition from Kinyarwanda to English as a medium of Instruction in upper primary.

The teacher as a subject expert knows and uses appropriate methods/techniques to assess students and give constructive feedback to the whole class. The teacher is able to link the content of her/his subject specialization with Education.

- **The teacher as a communicator**

The professional teacher displays a good example in expressing him/herself, stimulates and enhances positive and clear communication between him/herself and the students, between the students, college community and the wider society. A good communicator is open-minded and respects diversity within and around the college. This requires students to communicate in the official languages.

- **The teacher as a guide and an organizer**

The professional teacher facilitates the holistic development of all students, taking into account the differences between them. S/he ensures that the learning environment (class or playground) is well maintained and conducive for expected learning outcomes. This requires the teacher to be equipped with managerial skills

- **The teacher as an innovator, researcher and reflective practitioner**

The professional teacher looks for ways to improve his/her teaching, and the wellbeing and results of the students. S/he is a reflective practitioner and knows how to perform small-scale reflective actions.

The acquisition of such skills will require teachers to update knowledge and skills with minimum external support and to cope with evolution of knowledge advances for personal fulfillment in areas that need improvement and development, thus becoming lifelong learners.

1.5.3. Broad social studies competences

At the end of the three years the student teacher should be able to:

- Grow up as active, competent, responsible, and reflective members of society.
- Demonstrate perfect awareness of issues affecting society, locally, regionally and internationally and take positive and actions to provide solutions as responsible citizens.
- Develop a strong curiosity about real-world concerns and be proactive in solving historical, geographical and economic issues.
- Appreciate the Rwandan socio-cultural heritage and take positive actions to maintain the Rwandan image in the world.
- Discern and provide well-reasoned opinions, and explain their reasons on issues of historical, geographical and economic phenomena.
- Be creative and innovative in addressing common issues and challenges pertaining to the rapidly advancing technology and science for sustainable development.
- Become competent with a wide range of skills and active techniques necessary to teach Social studies subject in primary schools in local, regional and international education contexts.

1.5.4. Subject and Developing Competences

The national policy documents based on national aspirations identify some ‘basic competences’ alongside the ‘generic competences’ that will develop higher order thinking skills and help student teacher learn subject content and promote application of acquired knowledge and skills.

The student teacher will not only develop deductive and inductive skills but also acquire cooperation and communication, critical thinking and problem solving skills. This will be realized when student-teachers make presentations leading to inferences and conclusions at the

end of learning unit. This will be achieved through student teachers' group work and cooperative learning which in turn will promote interpersonal relations and teamwork.

The acquired knowledge in learning Social studies should develop a responsible citizen who adapts to scientific reasoning and attitudes and develop confidence in reasoning independently. The student teacher should show concern of individual attitudes, environmental protection and comply with the scientific method of reasoning. The scientific method should be applied with the necessary rigor, intellectual honesty to promote critical thinking while systematically pursuing the line of thought.

2. PEDAGOGICAL APPROACH

The change to a competence-based curriculum is about transforming learning, ensuring that learning is deep, enjoyable and habit-forming.

2.1. Role of the Student Teacher

In the competence-based syllabus, the student teacher is the principal actor of his/her education. He/she is not an empty bottle to fill. Taking into account the initial capacities and abilities of the student teacher, the syllabus suggests under each unit, some activities of the student teacher and they all reflect active participation in the learning process.

The teaching and learning processes will be tailored towards creating a student teacher friendly environment basing on the capabilities, needs, experience and interests.

The following are some of the roles or the expectations from the student teachers:

- Student teachers construct the knowledge either individually or in groups in an active way. From the learning theory, they move in their understanding from simple to complex.
- Student teachers work on one competence at a time to form concrete units with specific learning objectives (knowledge, skills and attitude).
- Student teachers will be encouraged to do research and present their findings through group work activities.
- A student teacher should be cooperative: they work in heterogeneous groups to increase tolerance and understanding.
- Student teachers are responsible for their own participation and ensure the effectiveness of their work.

2.2. Role of the Tutor

In the competence-based syllabus, the tutor is a facilitator, organizer, advisor, and conflict solver,

The specific duties of the tutor in a competence-based approach are the following, Tutor is:

- A facilitator, his/her role is to provide opportunities for student teachers to meet problems that interest and challenge them and that, with appropriate effort, they can solve. This requires an elaborated preparation to plan the activities, the place they will be carried, the required assistance;
- An organizer: his/her role is to organize the student teachers in the classroom or outside and engage them through participatory and interactive methods through the learning processes as individuals, in pairs or in groups. To ensure that the learning is personalized, active and participative, co-operative the teacher/tutor must identify the needs of the student teachers, the nature of the learning to be done, and the means to shape learning experiences accordingly;
- An advisor: he/she provides counseling and guidance for student teachers in need. He/she comforts and encourages student teachers by valuing their contributions in the class activities;
- A conflict-solver: most of the activities are performed in groups. The members of a group may have problems such as attribution of tasks; they should find useful and constructive the intervention of the teacher as a unifying element.
- Asked for help only when the whole group agrees to ask a question
- Ethical and preaches by examples by being impartial, by being a role-model, by caring for individual needs, especially for slow student teachers and those with physical impairments, through a special assistance, by providing remedial activities or reinforcement activities. One should notice that this list is not exhaustive.

Participants ensure the effective contribution of each member, through clear explanation and argumentation to improve the English literacy, to develop sense of responsibility, and to increase the self-confidence and the public speech ability.

2.3. Special Needs and Inclusive Education Approach

All Rwandans have the right to access education regardless of their different needs. The underpinnings of this provision would naturally hold that all citizens benefit from the same menu of educational programs. The possibility of this assumption is the focus of special needs education. The critical issue is that we have student teachers who are totally different in their ways of living and learning as opposed to the majority. The difference can either be emotional, physical, sensory and intellectual learning challenged.

These student teachers equally have the right to benefit from the free and compulsory basic education in the nearby ordinary/mainstream colleges. Therefore, the college's role is to enroll them and also set strategies to provide relevant education to them. The tutor therefore is requested to consider each student teacher's needs during teaching and learning process. Assessment strategies and conditions should also be standardized to the needs of these student teachers. Detailed guidance for each category of student teachers with special education needs is provided for in the guidance for teachers. The Social studies tutor is advised to work closely with the tutor of special needs education to provide appropriate support to any identified student -teacher's needs.

2.4. Skills laboratory pedagogy (skills lab)

Student teachers should have time to research, experiment and practice what has been taught in small groups in order to enhance the acquisition of competences. This is called "Skills Laboratory" or "Skills Lab. No special facilities or equipment is required for Skills Lab. In order for the students to learn programs focused on developing transferable 21st century skills, the pedagogical structure of skills lab is provided in the learning activities.

Skills lab is when student teachers are required to complete learning activities working in small groups. The skills lab is an easy method to change teacher's pedagogy from theory-based to competence-based instruction. Skills lab ensures teachers are accountable to completing all the learning activities and projects as outlined in the syllabus.

The basic characteristics of Skills Lab are:

- Students work in small groups (manageable teams)
- Assessment takes place through portfolio activities
- Students talk more than teachers (10% tutor talk time and the rest is for the students)
- Students receive constructive feedback on their work (Tutor gives quality feedback on student presentations).
- Skills lab consists of three components: build, practice and present.

Skills lab is the time when lesson combines the competences acquired during the unit and previous units to make learning more practical. Thus, at the end of every unit, this syllabus provides /suggest skills lab pedagogy lesson to ensure practical application of the competences acquired.

3. ASSESSMENT APPROACH

Assessment is the process of evaluating the teaching and learning processes through collecting and interpreting evidence of individual student teacher's progress in learning and to make a judgment about a student teacher's achievements measured against defined standards. Assessment is an integral part of the teaching learning process. In the new competence-based curriculum assessment must also be competence-based; whereby a student teacher is given a complex situation related to his/her everyday life and asked to try to overcome the situation by applying what he/she learned.

3.1. Types of Assessments

There are two major types of assessment namely formative and summative assessments. Any form of assessment should reflect the three domains of learning, which are Cognitive, Psychomotor and Affective.

- Knowledge and understanding: Does the student- teacher demonstrate an understanding of the Social studies concept? Has the student- teacher mastered the Social studies concepts? Indicators: correctness of answers, coherence of ideas, logical reasoning, use correctly mathematical symbols and concepts, etc.
- Practical skills: How does the student teacher perform on aptitude and practical tests? Indicators: accuracy, using appropriate methods, quality product, speed and efficiency, coherence.
- Attitude and values: How does the student-teacher respond to a task or a situation? What is the student teacher's behaviour? How the student teacher persists on solving a given problem?

3.1.1. Formative Assessment:

Formative assessment helps to check the efficiency of the process of learning. It is done within the teaching/learning process.

Continuous assessment involves formal and informal methods used by schools to check whether learning is taking place. When a tutor is planning his/her lesson, he/she should establish criteria for performance and behavior changes at the beginning of a lesson. Then, at the end of every unit, the tutor should ensure that all the student teachers have mastered the stated key unit competences basing on the criteria stated, before going to the next unit. The tutor will assess how well each student teacher masters both the subject and the generic competences described in the syllabus as well as the professional practices. From this, the tutor will gain a picture of the all-round progress of the student teacher. The tutor will use one or a combination of the following techniques: observation, pen and paper, and oral questioning.

3.1.2. Summative Assessment

When assessment is used to record a judgment of a competence development or performance of the student teacher, it serves a summative purpose. Summative assessment gives a picture of a student teacher's competence or progress at any specific moment. The main purpose of summative assessment is to evaluate whether competences have been achieved and to use the results for ranking or grading of student teachers, for deciding on progression, for selection into the next level of education and for certification. This assessment should have an integrative aspect whereby a student must be able to show mastery of all competences. It can be internal College based assessment or external assessment in the form of national examinations. College based summative assessment should take place once at the end of each term and once at the end of the year. College summative assessment average scores for the subjects which are examined at the national level will be weighted and included in the final national examinations grade. For the subjects which are not examined externally the grade should be part of the continuous assessment reflected in the student's transcript.

3.2. Record Keeping

This is gathering facts and evidence from assessment instruments and using them to judge the student's performance by assigning an indicator against the set criteria or standard. Whatever assessment procedures used generate data in the form of scores which will be carefully be recorded and stored in a portfolio. The latter is used in deciding remedial actions, alternative instructional strategy and as well as feed back to the student teacher. The records also are important to parents to check the learning progress and to advice accordingly. Finally, the records are very essential to the final assessment of professional practice of the student teacher at the end of the college.

This portfolio is a folder (or binder or even a digital collection) containing the student teacher's work as well as the student teacher's evaluation of the strengths and weaknesses of the work. Portfolios reflect not only work produced (such as papers and assignments), but also it is a record of the activities undertaken over time as part of student learning. Besides, it will serve as a verification tool for each student teacher that he/she attended the whole learning before he/she undergoes the summative assessment for the subject.

3.3. Item Writing in Summative Assessment

Before developing a question paper, a plan or specification of what is to be tested or examined must be elaborated to show the units or topics to be tested on, the number of questions in each level of revised Bloom's taxonomy and the marks allocation for each question. In a competence-based curriculum, questions from higher levels of Bloom's taxonomy should be given more weight than those from knowledge and comprehension level.

Before developing a question paper, the item writer must ensure that the test or examination questions are tailored towards competence based assessment by doing the following:

- Identify topic areas to be tested on from the subject syllabus.
- Outline subject-matter content to be considered as the basis for the test.
- Identify learning outcomes to be measured by the test.
- Prepare a table of specifications.
- Ensure that the verbs used in the formulation of questions do not require memorization or recall answers only but also testing broad, subject and generic competences as stated in the syllabus.

4. RESOURCES

4.1. Materials needed for implementation:

- Relevant textbooks and written materials
 - History of Rwanda.
 - Geographical and Historical maps.
- Physical, human and economic wall maps of Rwanda, different continents and the world.
- Textbooks, reference books, newspapers, maps, atlas, charts and globes.
- Software materials: computer, video clips, projector and internet.
- Photographs (ground, aerial and oblique).
- Models from the local environment (rocks, minerals, soils samples).
- Ordinary Survey Maps (O.S.M).
- Measuring instruments like rain gauge, thermometer, barometer, hygrometer, wind vane, anemometer, compass, clinometers and GPS.
- Stationary like manila papers, flip charts, etc.
- Adaptive materials like tactile and talking materials like talking globe, tactile maps, tactile illustrations, brailed equipment and materials.

- **Other needed materials**

- Internet.
- Films and videos (audio visual source).
- Historical sites.
- Memorial sites.
- Photographs.
- Braille.
- Museum.
- Tale, tactile maps, stories and the testimonies.
- Historical laminated maps (A2 size).
- Visual CDS, DVD, and Videos on History of genocide and other parts of History;
- Costumes related to the historical events and props.
- Testimonies of the Genocide survivors and perpetrators.
- Films of Genocide (seven days in Kigali), poems and songs.
- Dictionary for history and Geography.
- Posters of the evolution of man.
- Supplementary booklets on the Egyptian, Greek, Roman, Chinese, American, Incas, Aztec, Maya civilisations (the supplementary materials will support textbooks by providing a brief history of each of the above civilisation).
- Posters of the traditional tools e.g. arrows spears, shield, sword, ramming rod and axe.
- Booklet of the NGOs and Volunteers Organisations working in Rwanda.
- Booklets of the pictorial representation of the Ministries and their responsibilities in Rwanda.
 - Local heroes e.g. Fred Gisa Rwigema, Agathe Uwiringiyimana, Felicitée Niyitega.
 - Books on Rwanda: Inside the Hotel Rwanda, Confronting genocide in Rwanda; dehumanisation, denial and the strategies for prevention.

4. 2.Human resources

For an effective and efficient teaching of this History syllabus, it should be noted that a teacher should:

- Have at least A0 degree in Social studies education or History-Geography with Education from a recognized teaching Institution of Higher learning.
- Proper use of the text books, teachers' guide, historical information that is in line with this curriculum.
- Have a good command of the English language and use it properly.
- Have some basics skills and knowledge of special needs education like Rwandan sign language, braille reading and writing.

5. SYLLABUS UNITS

5.1. Social studies syllabus units for year one

5.1.1. Key Competences for end of Year One

- Explain the overview and the relationship between the components of social studies
- -Explain the earth movements and their effects.
- Analyze the formation of major relief regions of Rwanda and their effects on human activities
- Compare different types of rocks in Rwanda and their importance.
- Compare different types of soils of Rwanda and assess their importance.
- Analyze the climate of Rwanda and the impact of climate change on human activities.
- Appreciate the importance of different vegetation types and their conservation in Rwanda
- Analyze the drainage system of Rwanda and its relationships with human activities.
- Analyze the political, social and economic organization of pre-colonial Rwanda
- Evaluate the performance of the German and Belgian rules in Rwanda
- Evaluate the process of independence in Rwanda

5.1.2. Syllabus units for year One

| | | | | |
|---|---|---|---|--|
| Subject: SOCIAL STUDIES | | Year:1 | Option: EARLY CHILDHOOD AND LOWER PRIMARY EDUCATION | |
| TOPIC AREA: The concept of social studies | | Sub Topic: | | |
| Unit 1: GENERAL INTRODUCTION TO SOCIAL STUDIES | | | No. of periods: 3 periods | |
| Key Unit competence: The student-teacher should be able to explain the components of social studies and evaluate its importance. | | | | |
| Learning Objectives | | | | |
| Knowledge and understanding | Skills | Attitudes and values | Content | Learning Activities |
| <ul style="list-style-type: none"> - Give the meaning of social studies - Explain the components of social studies and their relationship - Explain the importance of studying social studies. | <ul style="list-style-type: none"> - Analyze the components of social studies. - Evaluate the importance of social studies in different contexts. | <ul style="list-style-type: none"> - Acknowledge the relationship among the components of social studies. - Appreciate the importance of studying social studies. | <ul style="list-style-type: none"> - Meaning of social studies - Components of social studies - Relationship among the components of social studies - Importance of learning social studies | <ul style="list-style-type: none"> - Through Think Pair Share, the students- teachers come up with the meaning of social studies. - The student- teachers discuss in groups the relationship among the components of social studies. - The student-teachers use internet, media, textbooks and resource persons and come up with the importance of studying social studies. |
| <i>Assessment criteria: The student-teacher is able to explain correctly the components of social studies and evaluate its importance.</i> | | | | |
| <i>Links to other Subjects :This unit is linked to social studies in primary schools, social environment in pre- primary and teaching methods and practice of social studies in TTCs.</i> | | | | |
| <i>Ressources: Textbooks, internet, ressource persons, charts, etc.</i> | | | | |

| Subject: SOCIAL STUDIES | | Year: 1 | | Option: EARLY CHILDHOOD AND LOWER PRIMARY EDUCATION | |

| Key Unit competence: The student-teacher should be able to differentiate the components of the universe and solar system, and explain the effects of the earth movements | | | | | |
| Learning Objectives | | | Content | Learning Activities | |
| Knowledge and understanding | Skills | Attitudes and values | | | |
| <ul style="list-style-type: none"> - Identify the components of the universe and the solar system. - Identify the planets in the solar system. - State the effects of the earth's movements. | <ul style="list-style-type: none"> - Describe the planets of the solar system. - Explain the consequences of the earth's movements | <ul style="list-style-type: none"> - Respect the earth and appreciate the need for the sustainable practices to protect the environment. - Appreciate uniqueness of the earth in relation to the other planets. - Appreciate the importance of the earth's movements. | <ul style="list-style-type: none"> - The Universe: - Definition of the universe. - Components of the universe. <p>The solar system:</p> <ul style="list-style-type: none"> - Components of the solar system - Earth: peculiar elements of the earth i.e. atmosphere, biosphere, hydrosphere and lithosphere. | <ul style="list-style-type: none"> - In groups, student-teachers are brainstormed about the meaning and the components of the universe and harmonization of findings. - Using internet, textbooks, globe and different photos, student-teachers identify the planets in the solar system and the elements of the Earth. - Using a clock, a movie, student-teachers, explain the consequences of the Earth movement. | |

| | | | | |
|--|--|--|---|--|
| | | | <ul style="list-style-type: none">- Earth's movements:<ul style="list-style-type: none">- Rotation and its effects,- Revolution and its effects. | |
|--|--|--|---|--|

Assessment criteria: The student-teacher is able to differentiate the components of the universe and solar system, and explain the effects of the earth movements accurately.

Links to other Subjects: This unit is linked to social studies in primary schools.

Resources: Internet, textbooks, globe and different photos and movies.

| Subject: SOCIAL STUDIES | | Year: 1 | | Option: EARLY CHILDHOOD AND LOWER PRIMARY EDUCATION | |
|--|--|---|---|---|--|
| TOPIC AREA: GEOGRAPHY | | Sub Topic: Physical geography | | | |
| Unit 3: FORMATION OF RELIEF FEATURES OF RWANDA | | | | No. of periods: 7 | |
| Key Unit competence: The student-teacher should be able to explain the formation major relief regions of Rwanda and evaluate their effects on human activities. | | | | | |
| Learning Objectives | | | Content | Learning Activities | |
| Knowledge and understanding | Skills | Attitudes and values | | | |
| <ul style="list-style-type: none"> - Locate Rwanda in Africa. - State the area of Rwanda in terms of land and water surface area. - Describe the population composition and the administrative divisions of Rwanda. - Locate the major relief regions of Rwanda. - Identify the major relief features of Rwanda using a map. - Give the importance of the relief features of Rwanda. | <ul style="list-style-type: none"> - Observe the map of Rwanda and write down the geographical coordinates and the neighbouring countries. - Draw a sketch map of Rwanda and locate the political divisions. - Differentiate among the major relief regions of Rwanda on the map. - Describe the formation of different relief features of Rwanda. - Investigate the importance of different relief features of Rwanda. | <ul style="list-style-type: none"> - Appreciate the natural beauty and the location of Rwanda. - Contribute to the national policy of maintaining a healthy environment in the country. - Appreciate the importance of different relief features of Rwanda. - Show concern for the causes and the effects of soil | <ul style="list-style-type: none"> - General presentation of Rwanda. - The relief regions of Rwanda. - Problems related to the relief features of Rwanda. - Importance of the relief features to the development of Rwanda. | <ul style="list-style-type: none"> - Use a map of Africa to locate Rwanda and write down the neighbouring countries. - In groups, identify that Rwanda is landlocked and consider the impacts of this. - Write down the findings from the group discussions and make a class presentation. - Use a map of Rwanda to locate and identify the administrative divisions. - In a field work tour, observe and record the major relief features of Rwanda. - In group presentations locate the different relief features using a sketch map of Rwanda. | |

| | | | |
|---|---|---|---|
| <ul style="list-style-type: none"> - Identify the problems related to the relief features of Rwanda. | <ul style="list-style-type: none"> - Explain major problems related to the relief features of Rwanda and suggest solutions | <ul style="list-style-type: none"> - erosion, and show continual desire to minimise the dangers of soil erosion. | <ul style="list-style-type: none"> - In a group work, discuss the importance of different relief features of Rwanda and present the findings to the class. - In a field work study, find out the areas affected by the soil erosion and weathering, and write a report of the findings. |
|---|---|---|---|

Assessment criteria: The student-teacher is able to correctly describe and explain the location, area, political divisions and some population characteristics of Rwanda; explain the processes responsible for evolution of different relief features and evaluate their effects on the human activities..

Links to other Subjects : This unit is linked to social studies in primary schools

Resources: Geographical documents, journals, maps, photographs, local environment, concrete objects, recorders, internet, statistical and fieldwork materials and equipment. Talking and tactile materials like tactile maps, smart talking globes, smart tactile atlas and brailed textbooks.

| | | | | | |

5.2. Social studies syllabus units for year two

5.2.1. Key Competences for end of year two

- Describe the Internal processes responsible for the evolution of different relief landforms and associated features.
 - Describe the external processes responsible for the evolution of different relief landforms and associated features.
 - Explain the mode of formation of rocks and their importance with special focus on the economic aspect.
 - Explain the factors for soil formation, the causes and effects of soil erosion, and soil conservation measures.
 - Appreciate the importance of the atmosphere, weather, and the impact of climate on the environment and human activities in the world.
 - Appreciate the distribution of different vegetation types in the world
 - Examine the achievements and failures of the 1st and the 2nd Republics in Rwanda
 - Assess the causes and consequences of Liberation war of 1990-1994 in Rwanda
 - Analyze forms of genocide denial and genocide ideology in Rwanda and abroad
 - Analyze the achievements and challenges of the Rwandan Governments in post genocide period (transition period and 3rd Republic)
 - Suggest ways of preventing genocide from happening again in Rwanda and elsewhere
-
- Examine the achievements and failures of the 1st and the 2nd Republics in Rwanda.
 - Assess the causes and consequences of Liberation war of 1990-1994 in Rwanda.
 - Analyze the achievements and challenges of the Rwandan Governments in post-genocide period
 - Analyze forms of genocide denial and genocide ideology in Rwanda and abroad
 - Suggest ways of preventing genocide from happening again in Rwanda and elsewhere
 - Suggest ways of preventing Human Rights violations (Forced labour for Children
-
- Analyze the national duties and responsibilities (Itorero, imihigo, Umuganda, community policing)
 - Explore ways of preventing conflicts and violence at national and international level

- Explore different major measures of home grown solution to solve conflicts (Abunzi, Gacaca)
- Identify the lessons that can be learnt from failed self –reliance policies of African leaders Explain how justice has been delayed and denied in Rwandan society.
- Critique how home-grown solutions contribute to self-reliance (Girinka, Ubudehe, Kuremera, Umuganda, Agaciro, Imihigo, Itorero community policing.
- Analyze different types of leadership management in Rwandan context (Imihigo, umushyikirano).
- Compare forms of democracy and justice in Rwanda and the neighboring countries
- Discuss the role of agents of colonial conquest (Christian missionaries, chartered companies and explorers).
- Describe European domination, exploitation in Africa and its consequences in the 19th Century.
- Analyze impact of colonial rule on political, economic and social on African societies.
- Analyze causes of African nationalism, the means used to regain independence in Africa and its impact on African societies

5.2.2. Syllabus units for year two

| | | | | | |
|--|--|---|--|---|--|
| Subject: SOCIAL STUDIES | | Year: 2 | | Option: EARLY CHILDHOOD AND LOWER PRIMARY EDUCATION | |
| TOPIC AREA: GEOGRAPHY | | Sub Topic: Physical geography | | | |
| Unit1: INTERNAL LANDFORM PROCESSES Faulting | | | | No. of periods: 3 | |
| Key Unit competence: <i>The student-teacher should be able to examine the internal processes responsible for the evolution of different relief landforms.</i> | | | | | |
| Learning Objectives | | | Content | Learning Activities | |
| Knowledge and understanding | Skills | Attitudes and values | | | |
| <ul style="list-style-type: none"> - Recall the processes leading to the formation of different faulted features. - Identify the major types of faults and the impact of faulting on the landscape - Identify the other areas that are associated with the faulting in the world. | <ul style="list-style-type: none"> - Explain the processes responsible for the formation of different faulted landforms. - Investigate the impact of different faulted landforms on the landscape - Describe the influence of faulting impact to the man. | <ul style="list-style-type: none"> - Appreciate the impact of faulting processes on the landscape. | <ul style="list-style-type: none"> - Faulting: definition. - Types of faults. - Distribution of the landforms associated with faulting. | <ul style="list-style-type: none"> - Use a range of different geographical sources and the materials like internet, text books research on the processes of faulting, types of faults and the major faulted landforms. Write down the findings. - In group work, discuss the findings and make a class presentation. - Use the knowledge acquired from the previous lesson and research from the text books and internet to find the distribution of faulting in the world. Record the findings. - In groups, discuss the findings and make a class presentation. | |
