RUTSIRO DISTRICT

SCHOOL: G.S NYAMYUMBA

MATHEMATICS P5

UNIT 1: WHOLE NUMBERS

LESSON 2: PLACE VALUE OF NUMBERS

Example: Indicate place values of each digit in 7 456 820

Skill: Count the digits in the number. There are 7 digits. Now draw a place value table with 7 places.

Millions	Hundred thousands	Ten thousands	Thousands	Hundreds	Tens	Ones
7	4	5	6	8	2	0

Knowledge: Place values are positions of ones, tens, hundreds, thousands, etc which show the value of each digit written under it.

Place values help us identify which figures have greater values than others.

Exercises: Write the place value of each digit in the following numbers.

1)13 289

2)416 228

3)31 048 267
