Jimmy and Tania were taking a nap. Jimmy wakes up:
"Oaf! It's dark. The sun hid behind the stars."
He starts asking his mom questions:

“Mom, what makes the sun shine and give so much light?” Jimmy asks.

“The sun is a star that’s much closer to earth than other stars and, during the day, it is so bright that we can’t see other stars shine.” Says Mom

“Where does the sunlight come from?” Jimmy asks

“Stars are gigantic balls of very hot gases and these gases are so hot that they give off light.”
Answers his mother

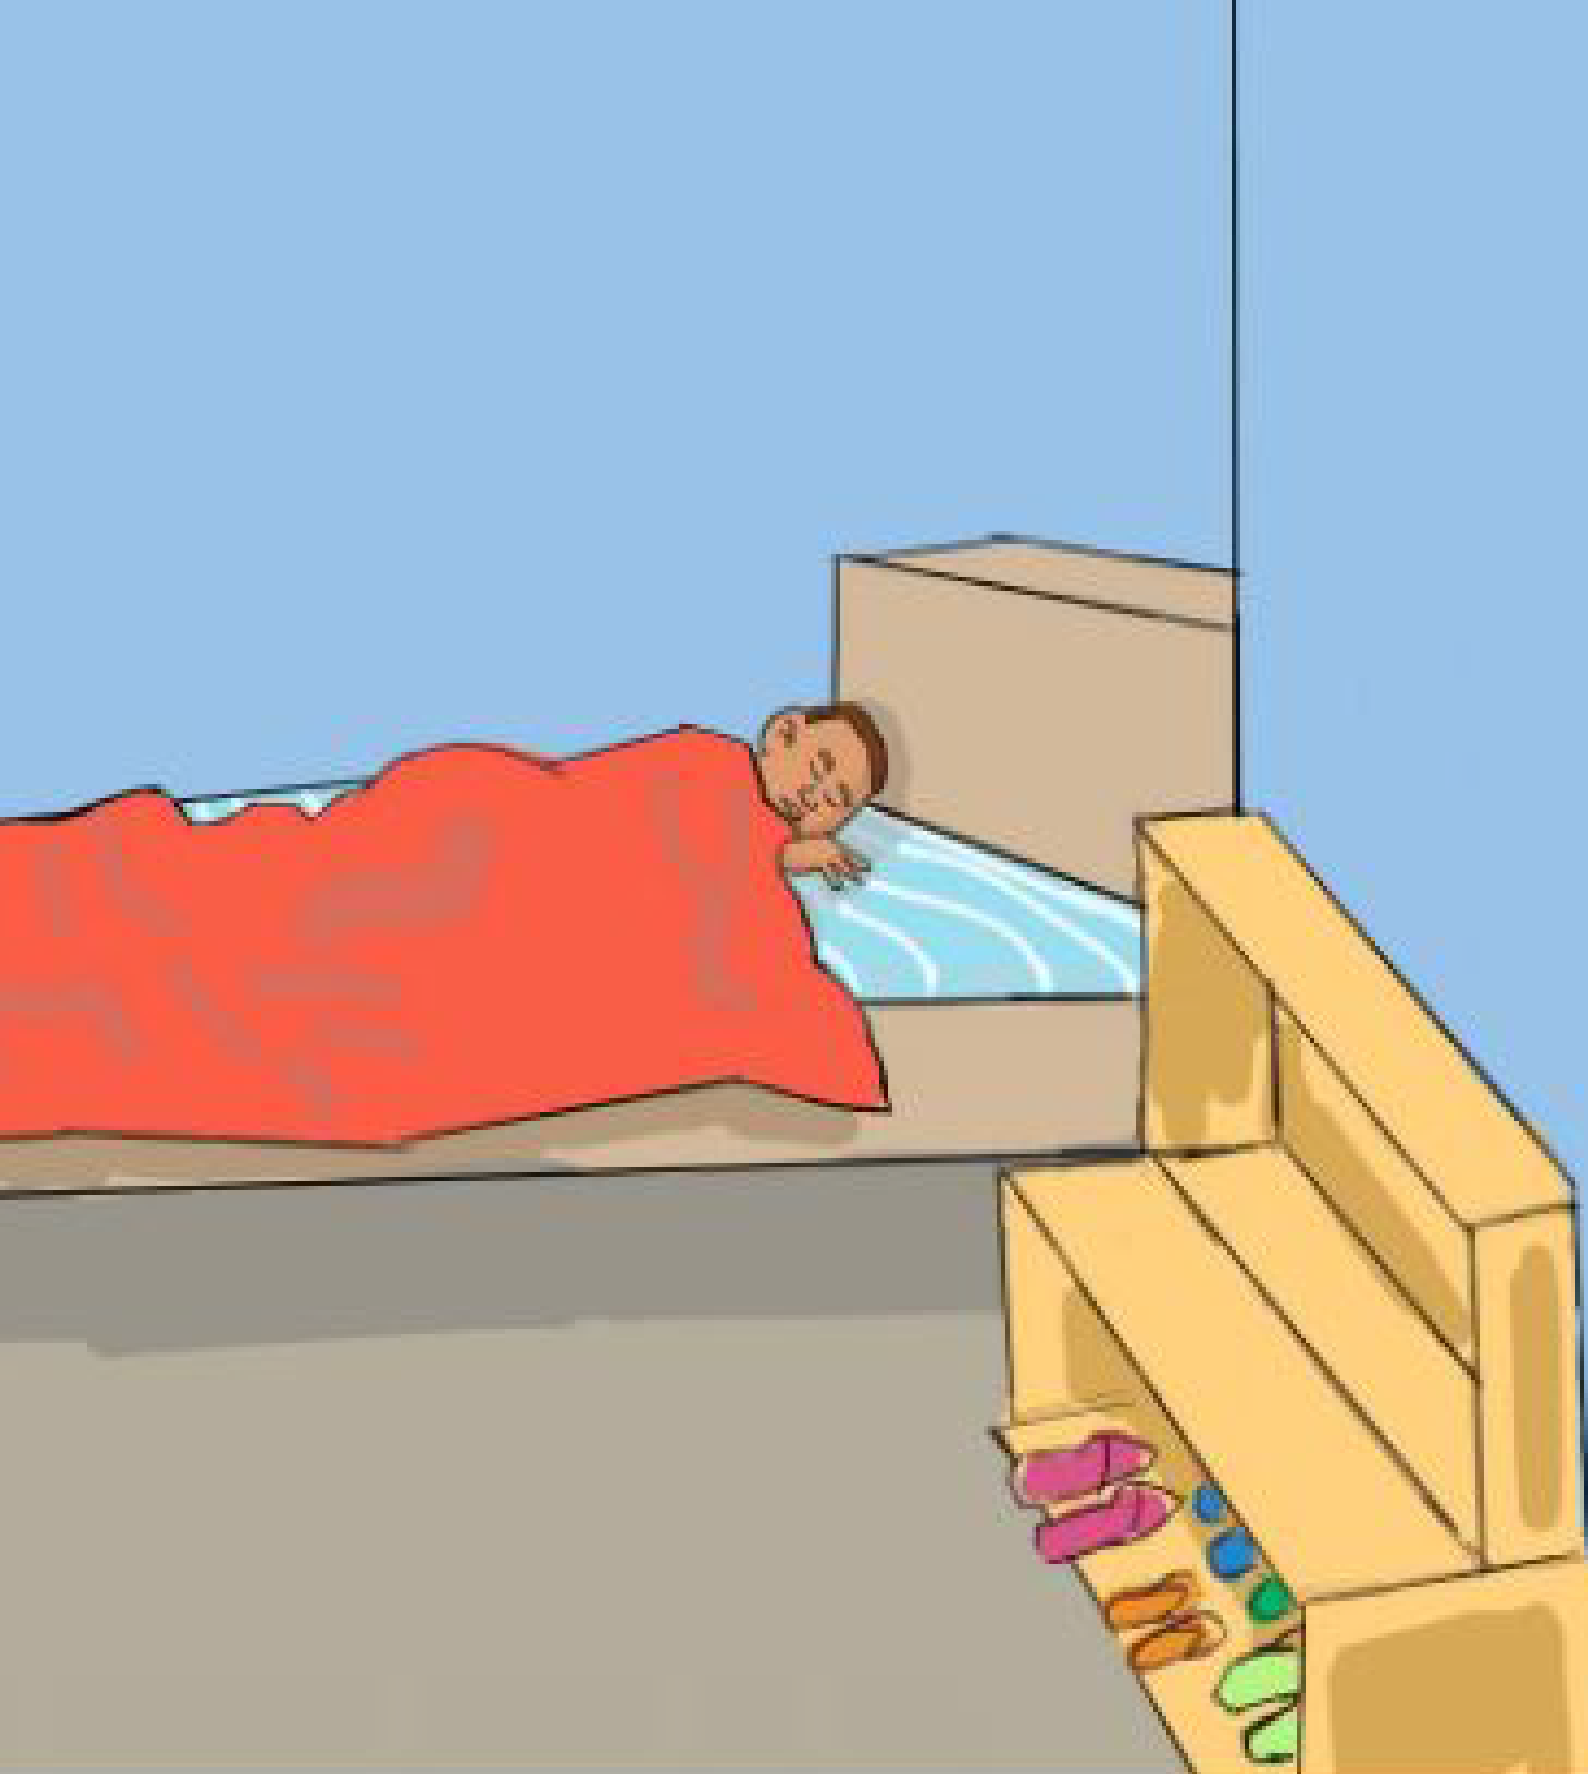

“During the day, where are stars?” Jimmy asks his mother again.

His mother replies that they are there just the same all times, very far away in space.

Jimmy wakes up his sister.

Tania, wake up!

Tania, come and see the starlight.
The weather is nice!
