SOCIAL AND RELIGIOUS STUDIES

Primary Two

Pupil’s Book 2
Dear pupil,

Rwanda Education Board is honoured to present to you this book of Social and Religious Studies for P2 as a part of Social and Religious studies subject. It will serves as a guide to competence-based teaching and learning in primary school to ensure consistency and coherence in the learning of Religious studies subject in Primary school. The Rwandan educational philosophy is to ensure that you achieve full potential at every level of education which will prepare you to be well integrated in society and exploit employment opportunities.

The government of Rwanda emphasizes the importance of aligning teaching and learning materials with the syllabus to facilitate your learning process. Many factors influence what you learn, how well you learn and the competence you acquire. Those factors include the instructional materials available among others. Special attention was paid special attention to the activities that facilitate the learning process in which you can develop your ideas and make new discoveries during concrete activities carried out individually or with peers.

In competence-based curriculum, learning is considered as a process of active building and developing knowledge and meanings by the learner where concepts are mainly introduced by an activity, a situation or a scenario that helps the learner to construct knowledge, develop skills and acquire positive attitudes and values.
For effective use of this textbook, your role is to:

• Work on given activities which lead to the development of skills
• Share relevant information with other learners through presentations, discussions, group work and other active learning techniques such as role play, case studies, investigation and research in the library, from the internet or from your community;
• Participate and take responsibility for your own learning;
• Draw conclusions based on the findings from the learning activities.

Specifically, this book is majorly divided into two parts: Social studies and Religious studies. Religious studies in again subdivided into Christian Religious studies and Islamic religious studies. Each school will choose exclusively one part. You will be able to develop skills, attitudes and values imbedded in Religious Studies of your choice with opportunity of exploring other content presented in the same book.

I wish to sincerely extend my appreciation to the people who contributed towards translation of this book the development of this book, particularly REB staff who organized the whole process. Any comment or contribution would be welcome for the improvement of this textbook for the next edition.

The following are some consequences of sins (Romans 6:23)

- God is self-sufficient/self dependent and does not need any support
- God did neither produce nor was produced

God alone must be worshipped. To worship other gods or other things is a grave sin. It is called Shirk. Shirk will be punished with eternal hell. God deserves all glory and praise.
Muslims believe in Angels. God created Angels in light. Angels are God’s respected servants. Angels pray and respect God’s commandments as required.
The following are examples of Angels:

- **Gabriel**: He is the leader of all Angels. He is in charge of delivering God’s message to Prophets.
