

## **SUMMARY OF POLICY THAT I MUST BE IMPLEMENTED ON NATIONAL LEVEL AND ON MY OWN CLASSROOM**

### **What do the policies tell us about classroom practice?**

- Laptop per child,
- They must have electronic library,
- Specific rules and regulation of use internet,
- Teacher must be able to use ICT tools in teaching and learning process.

### **How would we implement the policies at a national level?**

- We can implement the policies at national level, if all rules and regulation considered as planned:
- Training of primary and secondary school teachers on teaching with or use of ICT;
- The scholarship management programme;
- The Rwanda national Library network;
- Development of new e-learning content;
- Implementation of the Education Management Information System (EMIS);
- Carrying out a survey of educational software for potential use in formal and informal ICT training programmes;
- Conversion of existing Computer-Based Training and e-Learning Content to Kinyarwanda

### **We implement the policies at classroom level, in this way:**

- Development of electronic library, developing web contents and so on....
- Building strong computer lab,
- Build teacher capacity about ICT and use of ICT in teaching activities.
- Install strong internet connectivity,
- Provide teaching and learning software,
- Increase periods of ICT in week because it will be the main channel of studies

### **The challenges of implementing the policies**

- Incapacity of infrastructure,
- Lack of good level of using ICT tools in teaching and learning processes for teachers.

- Lack of teaching and learning software,
- Strong maintenance of computer lab,
- Lack of digital contents,

**Suggests&ideas**

- School leaders must understand benefits of using ICT in all activities
- Teacher to all levels must know how to use ICT tools to make good learning environment .
- Create managing system to all schools.
- Create digital contents (libraries).
